Current status

In Australia

As at 11:00 hrs on 9 March 2020, we have 80 confirmed cases of coronavirus (COVID-19), including 3 deaths, in Australia.

- 40 in New South Wales
- 12 in Queensland
- 6 in South Australia
- 2 in Tasmania
- 8 in Victoria
- 2 in Western Australia
- 10 associated with the Diamond Princess cruise ship

Further details:

- 15 of the initially reported cases in Australia all had a direct or indirect travel history to Wuhan, China
- 10 cases, including 1 death, are associated with the Diamond Princess cruise ship repatriation flight from Japan
- 16 cases are reported to have had a direct or indirect travel history to Iran
- 21 cases are reported to have had a travel history to countries including Singapore, the United

States of America, the United Arab Emirates, the United Kingdom, Italy, Iceland, Japan, the Republic of Korea, Thailand, the Philippines, Cuba, Indonesia, Nepal and Taiwan

- 18 cases, including 2 deaths, do not have a reported history of overseas travel
    - 15 of these cases are associated with an aged care facility in NSW. 2 residents of this facility have sadly died
    - 2 cases are either directly or indirectly associated with attendance at a workshop
    - 1 case is under investigation, with further details pending

Of the 80 Australian cases reported, 22 of these cases are reported to have recovered.

For questions about testing or the welfare of people with the virus, contact yourstate or territory health authority.

In the news

- The Australian Government has secured additional surgical, P2 and N95 masksfor the National Medical Stockpile, for medical and aged care professionals to care for patients with suspected or confirmed cases of COVID-19.
- The Prime Minister has announced the activation of the National Coordination Mechanism. The mechanism will coordinate activities across the Commonwealth, state and territory governments as well as industry to ensure a consistent national approach is taken to provide essential services across a range of critical sectors and supply chains.
- The Australian Government has committed to a 50-50 shared health funding deal with the states and territories to ensure a rapid health response to the evolving COVID-19 (coronavirus) outbreak.
- The Prime Minister has announced the activation of the Australian Health Sector Emergency Response Plan for Novel Coronavirus (COVID-19).
- Read the latest travel restrictions.

For more information, read the latest transcripts and media releases from our Chief Medical Officer and our Deputy Chief Medical Officer about coronavirus (COVID-19) in our news section.

You can also see updates in media releases and transcripts fromMinister Hunt relating to coronavirus on the Health Ministers' site.

Across the world

> Across the world, there have been more than 108,800 confirmed cases of coronavirus (COVID-19) and more than 3,700 reported deaths.

The majority of cases and deaths associated with COVID-19 have been reported from mainland China.

There have been more than 28,100 cases, including approximately 670 deaths, reported from 105 countries and regions outside mainland China.

> Of confirmed cases reported globally, the case fatality rate is approximately 3.4%. The

> case fatality rate in countries and regions outside mainland China is approximately 2.4%.

The majority of new cases are reported from Republic of Korea, Italy and Iran.

If you're planning any overseas travel, or have returned from an at risk country, see and follow the travellers and visitors information below..

Why is there an alert

On 30 January 2020, the World Health Organization declared the coronavirus outbreak a Public Health Emergency of International Concern.

On 27 February 2020, the Prime Minister announced the activation of the 'Australian Health Sector Emergency Response Plan for Novel Coronavirus (COVID-19)'.

Also read the 2019-nCoV National Guidelines for Public Health Units that are regularly updated

by the Communicable Diseases Network Australia (CDNA).

Read the Chief Medical Officer Professor Brendan Murphy's letter to doctors about the COVID-19 outbreak and the Commonwealth's support for the central role doctors play in our national response.

Read the joint statement from the Minister for Aged Care and Senior Australians, Minister Colbeck, and Australian Chief Medical Officer, Professor Brendan Murphy, about ensuring the delivery of safe, quality care to senior Australians.

For information about the epidemiology of cases in Australia and overseas, read the weekly epidemiological reports.

Australian Health Sector Emergency Response Plan for Novel Coronavirus (COVID-19)

The Australian Health Sector Emergency Response Plan for Novel Coronavirus (the COVID-19 Plan) was endorsed by the AHPPC on 17 February 2020.

The Australian Government will continue to monitor the emerging information and evidence closely. It will work with jurisdictions, through key committees and other relevant experts, to adapt the COVID-19 Plan as new information becomes available.

If you are at risk

In Australia, the people most at risk of getting the virus are those who have recently been in in a high risk country/region and people who have been in close contact with someone who has a confirmed case of coronavirus.

If you have returned from a country or region that is at higher risk for COVID-19 you can not attend work if you work in a setting with vulnerable people.

From previous experience with other coronaviruses, other categories of people at most risk of serious infection are:

- people with compromised immune systems (e.g. cancer)
- elderly people
- Aboriginal and Torres Strait Islander people
- people with diagnosed chronic medical conditions

- very young children and babies*
- people in group residential settings
- people in detention facilities

*At this stage, the risk to children and babies, and the role children play in the transmission of COVID-19, is not clear. However, there has so far been a low rate of confirmed COVID-19 cases among children relative to the broader population.

Travellers and visitors

On 5 March 2020, the Australian Government extended existing travel restrictions to include the Republic of Korea. All travel restrictions will be reviewed again before 13 March 2020.

As part of our ongoing strategy of containment and minimising risk to the Australian community, we are implementing additional screening of passengers at Australian airports.

Australian Border Force liaison officers at overseas airports will work with airlines to identify travellers who should not board.

Airlines will also be required to refuse uplift for anyone identified as being unwell.

Any passengers identified as unwell on the flight will be identified and referred for further assessment upon arrival.

Higher risk

The Australian Government considers the following countries to be at higher risk for COVID-19:

- Mainland China
- Iran
- Italy
- Republic of Korea

There are travel restrictions for travellers from mainland China, Iran and Republic of Korea.

If you are returning from mainland China or Iran you should isolate yourself for 14 days after leaving mainland China or Iran.

If you are travelling from the Republic of Korea, on or after 5 March, you must isolate yourself for 14 days from the time you left the Republic of Korea.

If you are arriving in Australia from Italy, you must present for health screening at the border as directed. Unless you are instructed to, you do not need to isolate at home.

If you work as a healthcare worker or as a residential aged care worker, you cannot attend work for 14 days after leaving Italy.

This advice should be read in conjunction with the 'What you need to know' and 'Isolation guidance' information sheets.

Moderate risk

The Australian Government considers the following countries to be at moderate risk for COVID-19:

- Cambodia
- Hong Kong
- Indonesia
- Japan
- Singapore
- Thailand

If you have recently travelled to these countries, monitor your health for 14 days after leaving that country. If you develop a fever or cough, seek medical advice urgently and isolate yourself.

Travel advice

The Department of Foreign Affairs and Trade (DFAT) has raised the level of advice for:

- Italy
- Iran
- Japan
- Republic of Korea (Daegu and Cheongdo)
- Mainland China
- Mongolia

> Australians travelling overseas are encouraged to regularly review theSmartraveller website and subscribe for updates.

China, Iran and Republic of Korea

Do not travel to mainland China, Iran and Daegu (Republic of Korea). This is the latestChina travel advice, Iran travel advice and Daegu travel advice from DFAT.

For Australians already in Iran, DFAT recommends travellers depart while commercial operations are available.

Foreign nationals (excluding permanent residents) who are in mainland China, will not be allowed to enter Australia until 14 days after they have left or transited through mainland China.

Foreign nationals (excluding permanent residents) who left Iran on or after 1 March, will not be allowed to enter Australia until 14 days after they have left or transited through Iran.

Foreign nationals (excluding permanent residents of Australia) who are in the Republic of Korea on or after 5 March 2020 will not be allowed to enter Australia for 14 days from the time they have left or transited through the Republic of Korea.

Australian citizens, permanent residents, and their immediate family (including spouses,

dependants and legal guardians) will still be able to enter Australia but will be required to isolate themselves for 14 days after the date they left China, Iran or the Republic of Korea.

If you:

- hold a visa for Australia or have applied for a visa, read the coronavirus fact sheet for visa holders and applicants
- are planning to travel to or transit through Australia, read the current travel restrictions
- plan to travel overseas, check the latest travel advice
- are concerned about someone overseas, call the DFAT consular emergency line

If you are on board an international flight and show signs of an infectious disease:

- the airline must report you to biosecurity officers
- biosecurity officers will assess you before you get off the plane
- you may be isolated or referred to a hospital

Australians on cruise ships

DFAT is providing consular assistance to Australians hospitalised and quarantined overseas because of COVID-19.

The Diamond Princess cruise ship

The Australian Government has assisted 170 people to depart Japan. They arrived in Darwin on a Qantas flight on 20 February 2020 and were quarantined at the Howard Springs Accommodation Village (Manigurr-ma Village Howard Springs).

Any passengers from the Diamond Princess who were not on the Qantas charter flight:

- will not be allowed on other flights to Australia before Wednesday 4 March 2020
- need to complete a 14 day quarantine period before travelling to Australia
- will be subject to health screening on entry if they have not completed the 14 day quarantine requirement
- may be subject to a Human Biosecurity Control Order under the Biosecurity Act 2015, that can include conditions restricting movement or requiring isolation.

Australians who are medically cleared from the Japanese health system will be provided a medical clearance form for presentation to officials upon arrival at the Australian border.

The Australian Embassy in Tokyo is providing consular assistance to a number of Australians hospitalised in Japan due to coronavirus.

Grand Princess Cruise Ship

DFAT is waiting on advice on whether any of the four Australians on board the Grand Princess cruise ship, moored off the Californian coast, have contracted COVID-19.

The Australian Consulate-General in San Francisco stands ready to provide consular assistance to Australian citizens on board.

Australians in quarantine

To support the quarantine process Howard Springs Accommodation Village (Darwin) (Manigurr-ma Village Howard Springs) will act as a human health response zone.

164 passengers from the Diamond Princess (Australian citizens, dual nationals and family members) underwent a 14 day quarantine period at the Howard Springs Accommodation Village (Manigurr-ma Village Howard Springs).

10 passengers have tested positive to COVID-19 since their arrival in Darwin. 9 have been transferred to their home state for medical treatment.

The facility has strong isolation procedures in place.

All passengers from the Diamond Princess cruise ship who completed the 14 day quarantine at Howard Springs have been medically cleared.

International students

Year 11 and 12 students

Year 11 and 12 students who remain in China (outside Hubei Province) due to Australian travel restrictions have been offered a strict pathway to resume their studies. This is in recognition of the importance of the final 2 years of school.

Students who are completing their senior secondary schooling can apply for an exemption to the 1 February 2020 COVID-19 travel restrictions applied to foreign nationals who have been in mainland China (except Hubei Province). The exemptions will be considered on a case by case basis.

Australian Border Force has information for student visa holders

We are delivering more Australian education services online and offshore for international students. To find out more and for support, go to coronavirus updates for international students on the Study in Australia website.

What we are doing

Australia is well prepared.

Our first class health system includes mechanisms for early detection and effective management of cases and contacts. Our plans include a range of interventions to minimise transmission and mitigate the impact of the outbreak.

Australian Government agencies and state and territory governments are working together to coordinate an evidence-based response. This includes:

- applying travel restrictions to reduce the number of travellers from mainland China, Iran and the Republic of Korea
- applying a 14-day isolation period to people at risk of getting coronavirus
- continuing to screen travellers who arrive in Australia
- tracing coronavirus cases

- continuing with border surveillance
- providing information in English and Chinese based on the latest medical advice, including through Facebook, Twitter, Weibo, WeChat and Chinese newspapers
- applying enhanced border measures at international air and sea ports, including announcements and signs

A total of over 1.4 million P2 and surgical masks have been made available from the National Medical Stockpile as part of the Government's response to COVID-19. The Government is also investigating further sources of supply for personal protective equipment, both internationally and domestically.

State and territory health authorities are:

- testing anyone who shows symptoms of the virus
- monitoring close contacts of confirmed cases every day
