Current status

The World Health Organization (WHO) has announced that COVID-19 is a pandemic.

Currently, Australia does not have widespread community transmission of COVID-19. Find out how we are managing the outbreakto slow the spread.

Coronavirus (COVID-19) at a glance

This infographic provides a quick view of the current coronavirus (COVID-19) situation in Australia. We update it every afternoon based on the data we receive by 3.00pm from states and territories.

In Australia

As at 3:00pm on 18 April 2020, there have been 6,565 confirmed cases of COVID-19 in Australia. There have been 42 new cases since 3:00pm yesterday.

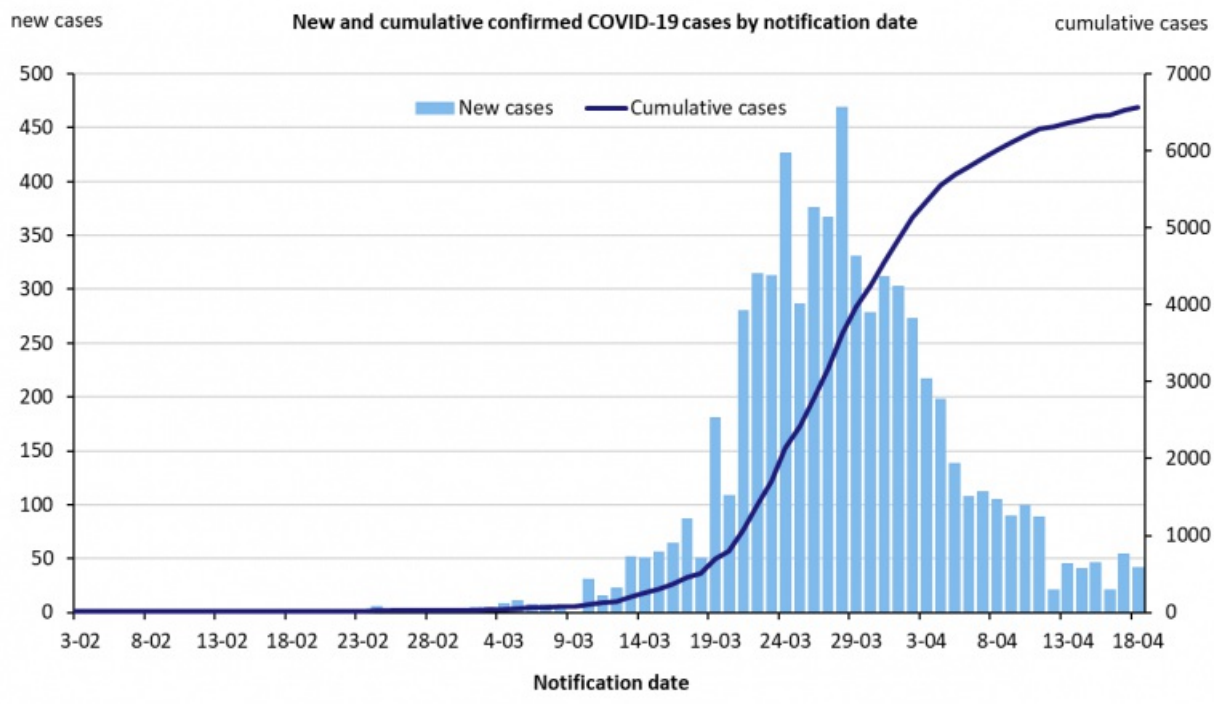

Of the 6,565 confirmed cases in Australia, 68 have died and 4,163 have been reported as recovered from COVID-19. More than 406,000 tests have been conducted across Australia.

Location	Confirmed cases*
Australian Capital Territory	103
New South Wales	2,936
Northern Territory	27
Queensland	1,014
South Australia	435
Tasmania	187
Victoria	1,319
Western Australia	544
Total	**6,565**

* Note that under National Notifiable Diseases Surveillance System reporting requirements, cases are reported based on their Australian jurisdiction of residence rather than where they were detected. For example, a case reported previously in the NT in a NSW resident is counted in the national figures as a NSW case.

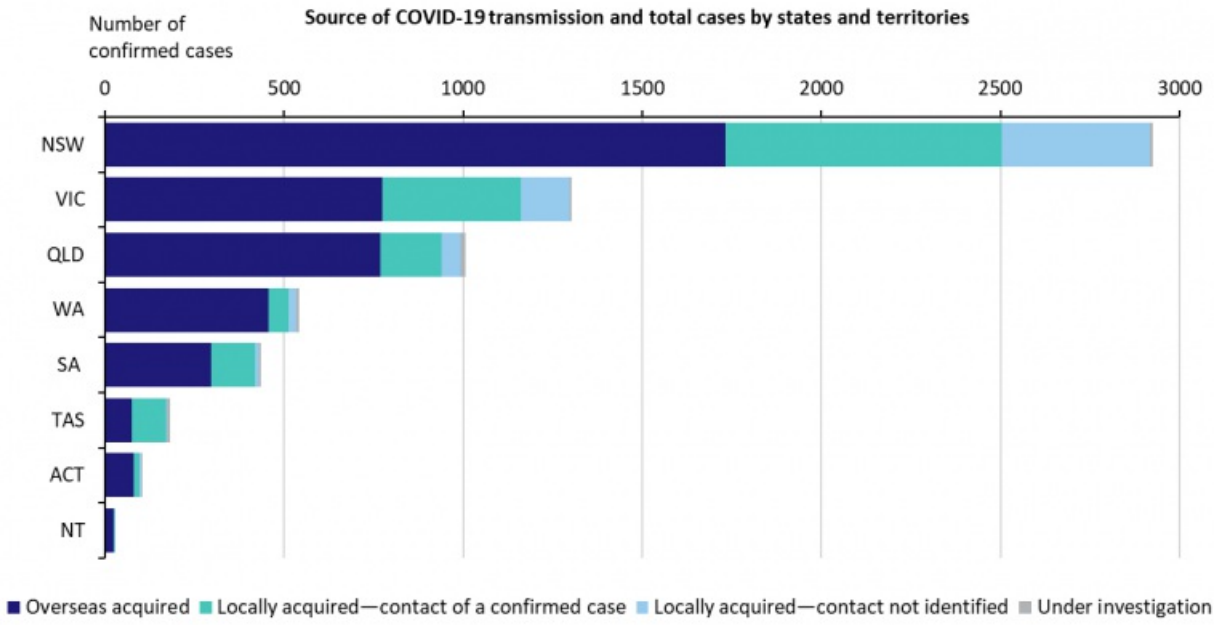

Daily overview of cases

Data used in the daily overview are updated every afternoon based on the data we receive by 3.00pm from states and territories.
