Global Epidemiological Update

The African region reported the maximum increase in number of new cases and the Omicron VOC has been reported in more than 76 countries as of date. The high transmissibility of the Omicron VOC is raising concerns although data on severity is still in its preliminary stages.

National update

58450 cases and2423 deaths were recorded from the week.

WEEKLY SUMMARY

- 19 cases were reported from the week with a weekly sample positivity rate of 0.5%. Dimapur (9), Kohima (7), Mokokchung (2) and zunheboto (1) reported new cases from the week.
- 2 covid-19 deaths were reported from Dimapur (1) and Mokokchung (1)
- 5 new admissions were recorded from COVID-19 hospitals
- A total of 13.27 lakh doses of COVID-19 vaccine have been administered till date

As on 17 DEC 2021

Global | National | State

Variables	Confirmed cases	Deaths	Death Rate	Total Covid-19 vaccine doses given
World	27,19,63,258	53,31,019	1.96%	8.33 billion
India	3,47,33,194	4,77,158	1.37%	1.36 billion
Nagaland	32,165	685	2.13%	13.27 lakhs

In the past week:

World: 40,97,969 cases and 45,131 deaths.

India: 58,450 cases and 2,423 deaths.

Nagaland: 19 cases and 2 deaths.

In the wake of the new emerging Variant (B.1.1.159), citizens are strongly advised for the following preventive measures

- **COVID-19 vaccination at the earliest** to prevent hospitalizations and deaths as Vaccines are very effective against circulating variants like Delta and expected to be effective against severe disease and deaths by Omicron VOC
- **Compulsory masking** in public places
- **Crowd control** in any social, religious, or political gathering to avoid super spreader events.

The festive season brings in much cheer and joy, but it comes with an increased risk of infections and super spreader events due to more interactions between people unless all citizens of the state come together and do their part.
