Notes

Data are preliminary and subject to change

Data Release Schedule

Vaccine administration data updated by 5 p.m. MT Wednesday, excluding holidays.

This dashboard does not determine vaccine availability. Visit our website to find when and where to get your vaccination. You must have an appointment to receive a vaccine.

The dashboards outline doses distributed and doses administered by the public health districts and enrolled providers. Distributed doses include first, second and booster doses. Some of the doses that have not been administered may be scheduled for an appointment or may not be reported in our Immunization system yet as providers have 72 hours to report after a dose has been given. It is also important to note that second doses cannot be given until at least 21 days after the first dose. Providers receive second doses up to a week prior to the dose being due, so much of the inventory is due to second doses being stored until the individual is eligible to receive it. To ensure HIPAA regulations are met and individual privacy is protected, counts less than 10 are suppressed and will show as a blank value; percentages are still calculated in these instances.

This data does not include the number of patients or doses of immunization that have been removed from the registry due to a patient voluntary opt-out of Idaho IIS.

Administration data are retrieved from Idaho's Immunization Reminder Information System (IRIS). The Idaho Department of Health and Welfare Immunization Program maintains Idaho's Immunization Reminder Information System (IRIS), a secure health information system containing the names and immunization history of people who have received vaccinations in Idaho. IRIS helps remind patients when immunizations are needed, provides patients with a permanent immunization record to help reduce unnecessary immunizations, and saves health care provider's time when requesting patient records. The information in IRIS is available only to authorized health care providers, child care providers, and schools. Data does not include patient or immunization data for any individual who has chosen to Opt-Out of Idaho IIS.

Definitions

People who are fully vaccinated: Individuals vaccinated with a single dose vaccine, or both doses of a two-dose vaccince.
People who received one dose of a two-dose series (series in progress): Individuals vaccinated with the first dose of a two-dose vaccine.
People who received at least one dose: Individuals fully vaccinated + Individuals who received one dose of a two-dose series (series in progress).
People who received a booster dose: Individuals who are fully vaccinated and received a booster dose after 8/12/2021.
People who received a second booster dose: Individuals who are fully vaccinated, received a first booster dose after 8/12/2021, and received a second booster dose after 3/29/2022.
People who received a pediatric dose (6m-4): Individuals receiving the pediatric Pfizer BioNTech or pediatric Moderna vaccine and who are between the ages of 6 months and 4 years of age. Starting on June 21, 2022 children aged 6m-4 years were eligible for the Pfizer BioNTech and Moderna pediatric COVID-19 vaccines.
People who received a pedriatric dose (5-11): Individuals receiving the pediatric Pfizer-BioNTech COVID-19 vaccine and who are between the ages of 5 and 11 years of age.

Population Estimates
Source: National Center for Health Statistics. Bridged-race postcensal estimates of the resident population of the United States for July 1, 2020 by county, single-year of age, bridged race, Hispanic origin, and sex. Prepared under a collaborative arrangement with the United States (U.S.) Census Bureau; released by the U.S. Census Bureau on September 22, 2021. Note: Population estimates used in dashboard calculations are for 0-4 years, not 6m-4 years, due to the aggregation of available census population data.

Population by ZIP code: source: Experian CAPE 2020 Current-Year Estimates.

This dashboard includes key metrics and benchmarks of COVID-19 vaccine data in Idaho, including vaccinated population distribution, administration, and inventory volu..

Vaccine Administrations by County and PHD

This dashboard includes vaccination percentages and the number of people vaccinated by Public Health District (PHD) and county, and daily/cumulative administered doses as..

Vaccine Uptake by ZIP Code

The Vaccine Uptake by ZIP Code tab displays the number of people fully vaccinated by ZIP code and the percentage of the population fully vaccinated by ZIP code in the top bar chart. The bottom bar chart displays the number of people fully vaccinated by ZIP code for ZIP codes that have no population data. See the notes below for an explanation for why some ZIP codes have no population data.

Notes:
ZIP codes are used within the United States to help the United States Postal Service (USPS) route mail. Remote and especially rural areas of the country do not have enough deliverable addresses to create a mail route and therefore not everywhere in the US is ..

Demographics

This dashboard includes a summary of Idaho's total population by key demographic features of age group, sex, race and ethnicity.

When a large number of records have missing data, the conclusions drawn from those data could be biased. Caution should be used when interpreting race and ethnicity data because a large proportion of the records are missing these data.

Notes:

Race and ethinicity data of vaccinated population are displayed as reported in Idaho IIS.
