Contact Tracing

A Confidential Public Health Resource

What is Contact Tracing?

Contact Tracing is a process used by the Kentucky Department for Public Health to help stop the spread of diseases like COVID-19.

GOAL: Stop the Spread and Save Lives

Public Health workers reach out to individuals who have contracted COVID-19 to assess their situation and track any recent in-person contacts.

Tracers reach out to identified contacts to provide instructions and connect them to local resources.

By following instructions provided by the Tracer, contacts help stop the spreadof COVID-19 and save the lives of Kentuckians.

What if I am contacted?
