Weekly COVID-19 Public Health Report

The Weekly COVID-19 Public Health Report includes enhanced, more granular information to be updated on a weekly, or biweekly basis, including town-by-town case and testing information, cases and deaths in Long Term Care Facilities, updates on nursing facility audit results, and more.

Table of Contents

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town ..... Page 3
Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by County ..... Page 25
Map of Average Daily Incidence Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks ..... Page 26
Map of Average Daily Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks ..... Page 27
Map of Percent Positivity (PCR only) among Tests Performed for COVID-19 in MA by City/Town Over Last Two Weeks ..... Page 28
Map of Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region ..... Page 29
Massachusetts Residents Quarantined due to COVID-19 ..... Page 30
Massachusetts Residents Isolated due to COVID-19 ..... Page 31
MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed ..... Page 32
MA Contact Tracing: Case and Contact Outreach Outcomes ..... Page 33
Cases and Case Rate by Age Group for Last Two Weeks ..... Page 34
Cases and Case Rate by Sex for Last Two Weeks ..... Page 35
Hospitalizations & Hospitalization Rate by Age Group for Last Two Weeks ..... Page 36
Deaths and Death Rate by Age Group for Last Two Weeks ..... Page 37
Deaths and Death Rate by County for Last Two Weeks ..... Page 38
Probable Case Information ..... Page 39
Daily and Cumulative Probable Cases ..... Page 40
COVID Cases and Facility-Reported Deaths in Long Term Care Facilities ..... Page 41
Long-Term Care Staff Surveillance Testing ..... Page 49
CMS Infection Control Surveys Conducted at Nursing Homes ..... Page 73
COVID Cases in Assisted Living Residences ..... Page 84
PPE Distribution by Recipient Type and Geography ..... Page 89

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town, January 1, 2020 – August 12, 2020

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days)[1]	Relative Change in Case Counts[2]	Total Tests	Total Tests (Last 14 days)	Total Positive Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity[3]
Abington	249	7	2.8	No Change	3465	412	10	2.43%	Higher
Acton	176	<5	<5	No Change	4686	822	4	0.49%	Lower
Acushnet	103	<5	<5	Lower	1858	242	3	1.24%	Lower
Adams	35	0	0	No Change	1259	243	0	0%	No Change
Agawam	510	15	3.7	Lower	7866	1571	19	1.21%	Lower
Alford	<5	0	0	No Change	42	9	0	0%	No Change
Amesbury	196	5	2.1	Higher	3731	583	6	1.03%	Higher
Amherst	118	12	2.1	Higher	4867	1006	13	1.29%	Lower
Andover	337	14	2.8	Higher	8331	1489	14	0.94%	No Change
Aquinnah	<5	0	0	No Change	130	29	0	0%	No Change
Arlington	327	<5	<5	Lower	9628	1715	7	0.41%	Lower
Ashburnham	35	<5	<5	Higher	1207	199	2	1.01%	Higher
Ashby	15	0	0	No Change	519	88	0	0%	No Change
Ashfield	<5	0	0	No Change	247	40	0	0%	No Change
Ashland	264	6	2.2	Lower	4085	731	7	0.96%	Lower
Athol	69	0	0	Lower	2952	439	0	0%	Lower
Attleboro	711	23	3.6	Higher	8608	1026	29	2.83%	Lower

PLEASE NOTE: A large number of false positive laboratory results received from one laboratory last week led to artificially increased risk levels for two communities (Fall River and Taunton) in the 8/12 report. Risk levels have been recalculated for those communities. Testing at that laboratory has been suspended and an investigation is ongoing. Data are current as of 10am on 8/12/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. [1] **White**:<5 reported cases in the last 14 days; **Green**: Average daily case rate over the last 14 days: <4 cases per 100,000 population; **Yellow**: Average daily case rate over the last 14 days: 4-8 cases per 100,000 population; **Red**: Average daily case rate over the last 14 days: >8 cases per 100,000 population. [2]Number of new cases occurring over the current two-week period (7/26/2020 - 8/8/2020) compared to the previous two-week period (7/19/2020 – 8/1/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. [3]Change in percent positivity compared to the previous week's (8/5/2020) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) **Please note**: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Halifax	59	0	0	Lower	1392	178	0	0%	No Change

PLEASE NOTE: A large number of false positive laboratory results received from one laboratory last week led to artificially increased risk levels for two communities (Fall River and Taunton) in the 8/12 report. Risk levels have been recalculated for those communities. Testing at that laboratory has been suspended and an investigation is ongoing. Data are current as of 10am on 8/12/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. [1] **White**:<5 reported cases in the last 14 days; **Green**: Average daily case rate over the last 14 days: <4 cases per 100,000 population; **Yellow**: Average daily case rate over the last 14 days: 4-8 cases per 100,000 population; **Red**: Average daily case rate over the last 14 days: >8 cases per 100,000 population. [2]Number of new cases occurring over the current two-week period (7/26/2020 - 8/8/2020) compared to the previous two-week period (7/19/2020 – 8/1/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. [3]Change in percent positivity compared to the previous week's (8/5/2020) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) **Please note**: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

PLEASE NOTE: A large number of false positive laboratory results received from one laboratory last week led to artificially increased risk levels for two communities (Fall River and Taunton) in the 8/12 report. Risk levels have been recalculated for those communities. Testing at that laboratory has been suspended and an investigation is ongoing. Data are current as of 10am on 8/12/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. [1] **White**:<5 reported cases in the last 14 days; **Green**: Average daily case rate over the last 14 days: <4 cases per 100,000 population; **Yellow**: Average daily case rate over the last 14 days: 4-8 cases per 100,000 population; **Red**: Average daily case rate over the last 14 days: >8 cases per 100,000 population. [2]Number of new cases occurring over the current two-week period (7/26/2020 - 8/8/2020) compared to the previous two-week period (7/19/2020 – 8/1/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. [3]Change in percent positivity compared to the previous week's (8/5/2020) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) **Please note**: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Data are current as of 10am on 8/12/2020; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. [1] **White**:<5 reported cases in the last 14 days; **Green**: Average daily case rate over the last 14 days: <4 cases per 100,000 population; **Yellow**: Average daily case rate over the last 14 days: 4-8 cases per 100,000 population; **Red**: Average daily case rate over the last 14 days: >8 cases per 100,000 population. [2]Number of new cases occurring over the current two-week period (7/26/2020 - 8/8/2020) compared to the previous two-week period (7/19/2020 – 8/1/2020). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. [3]Change in percent positivity compared to the previous week's (8/5/2020) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) **Please note**: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town, January 1, 2020 – August 12, 2020

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days)[1]	Relative Change in Case Counts[2]	Total Tests	Total Tests (Last 14 days)	Total Positive Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity[3]

Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region

7 Day Total of New Cases Through August 5, 2020

EMS Region	New Cases Per 100,000
1	16
2	14
3	31
4	24
5	20

Notes

(1) Massachusetts is divided into five geographical EMS regions. For more information, please see https://www.mass.gov/service-details/ems-regions-in-massachusetts.

(2) Cases per 100,000 for each EMS region are calculated as the number of new cases within a region divided by that region's population multiplied by 100,000.

(3) Data source: MAVEN and Umass Donahue Institute Population Estimates.

(4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

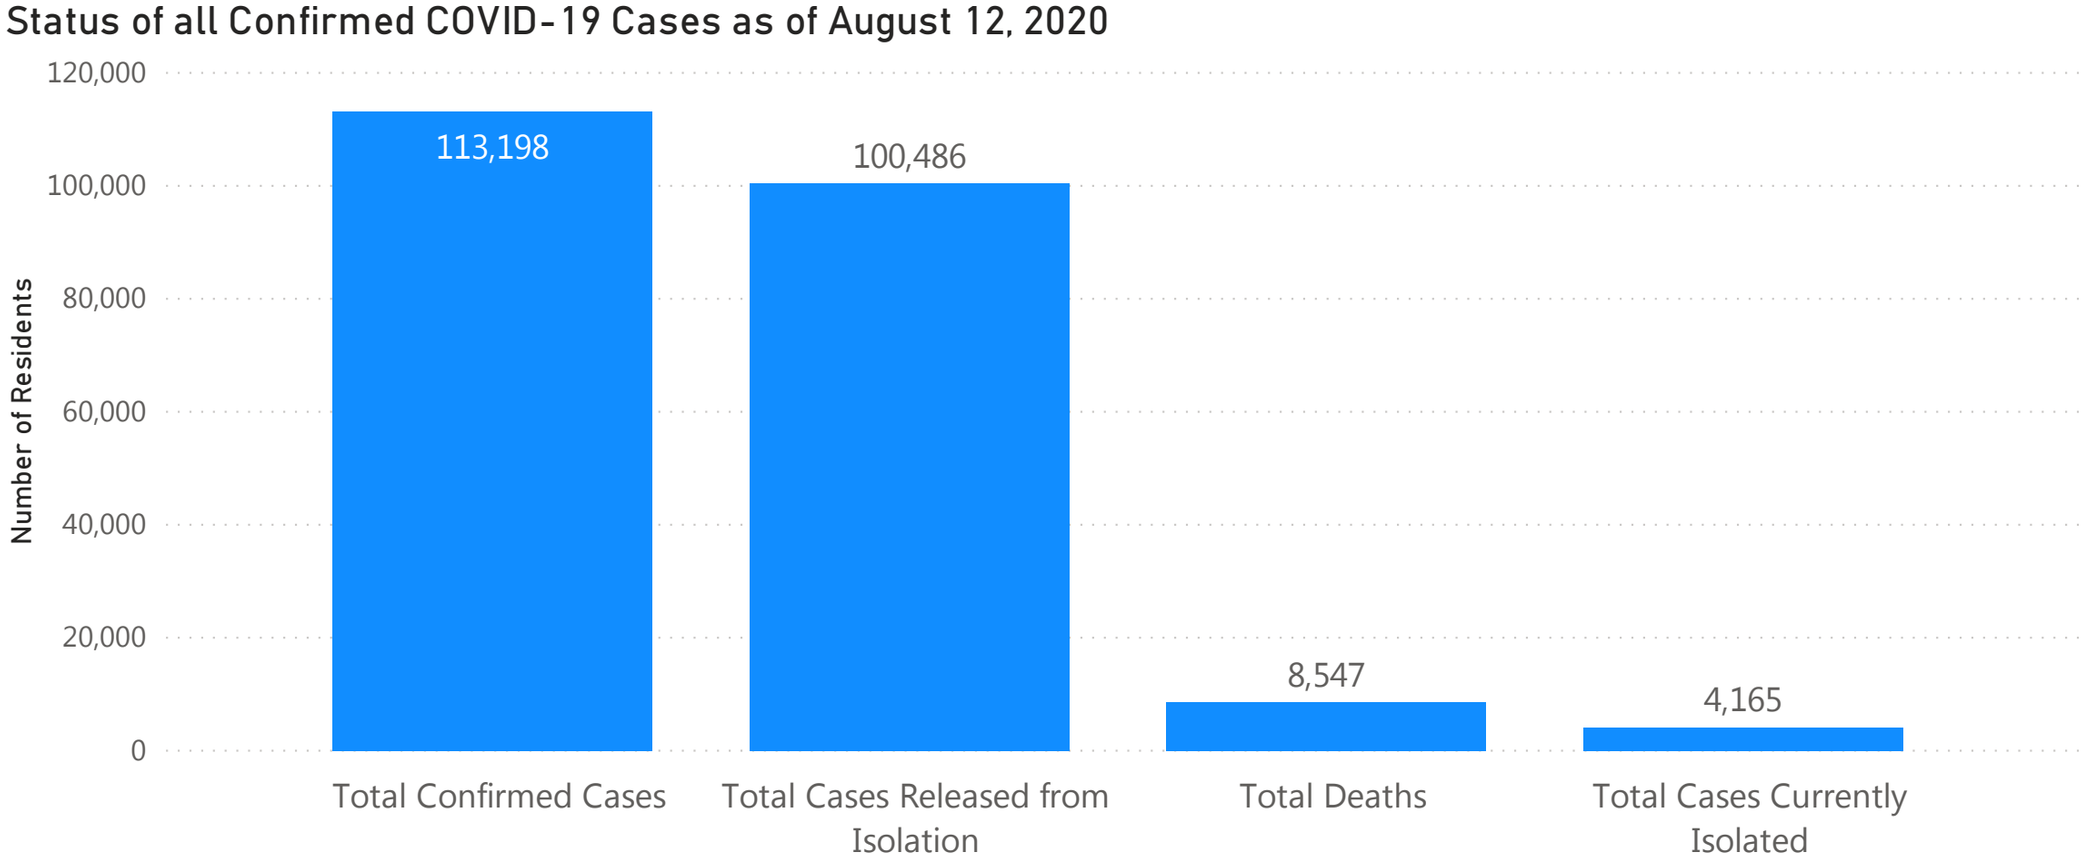

Massachusetts Residents Quarantined due to COVID-19

Data are accurate as of 8/11/2020 at 5p.m.

Massachusetts Residents Subject to COVID-19 Quarantine by Current Status as of August 12, 2020	Number of Residents
Total of Individuals who have Completed Monitoring (no longer in Quarantine)	74,610
Total of Individuals Currently Undergoing Monitoring/Under Quarantine	2,773
Total of Individuals Subject to Quarantine	**77,383**

Learn more about quarantine or self monitoring.

Massachusetts Residents Isolated due to COVID-19

NOTE: Individuals who had a confirmed case of COVID-19 and are no longer in isolation are considered for purposes of this report to be recovered. As part of this definition, DPH is counting people as released from isolation after 21 days of illness or 21 days past the date of their test in all settings including nursing homes and state facilities.

MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed

Cases Identified for Outreach: **91,600** Apr. 10, 2020 – Aug. 8, 2020	
Local Health Departments: **62,488** Cases Identified for Outreach	Community Tracing Collaborative: **29,112** Cases Identified for Outreach

Contacts Identified for Outreach: **58,385** Apr. 10, 2020 – Aug. 8, 2020	
Local Health Departments: **35,155** Contacts Identified for Outreach	Community Tracing Collaborative: **23,230** Contacts Identified for Outreach

Case Outreach Completed: **92.0%** Apr. 10, 2020 – Aug. 8, 2020	
Local Health Departments: **96%** Cases with Outreach Completed	Community Tracing Collaborative: **84.2%** Cases with Outreach Completed

Contact Outreach Completed: **78.4%** Apr. 10, 2020 – Aug. 8, 2020	
Local Health Departments: **71.0%** Contacts with Outreach Completed	Community Tracing Collaborative: **90.0%** Contacts with Outreach Completed

Total Workforce (Aug. 10, 2020)	**2,118**
Local Health + MDPH	1,527
CTC	591

Combined case investigation, contact tracing, and monitoring workforce

Note: The COVID-19 Community Tracing Collaborative (CTC) began operation on April 10, 2020. Data in this dashboard reflects the combined contact tracing of Local Health Departments, Massachusetts Department of Public Health (MDPH) and the CTC since that date. Prior to April 10, 2020, all COVID-19 contact tracing in Massachusetts was conducted by Local Health Departments.

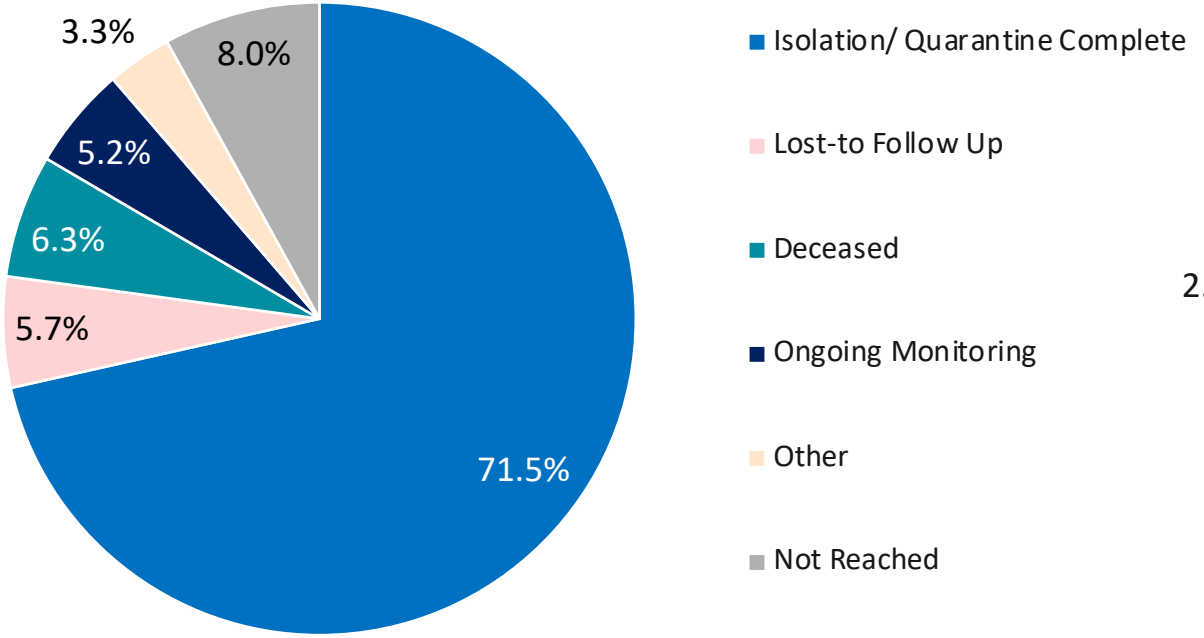

MA Contact Tracing: Case and Contact Outreach Outcomes

Case Outreach Completed:

Cases and Case Rate by Age Group for Last Two Weeks

This data covers 7/26/2020 to 8/8/2020

Total COVID-19 Cases by Age Group for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Cases by Age Group for Last Two Weeks

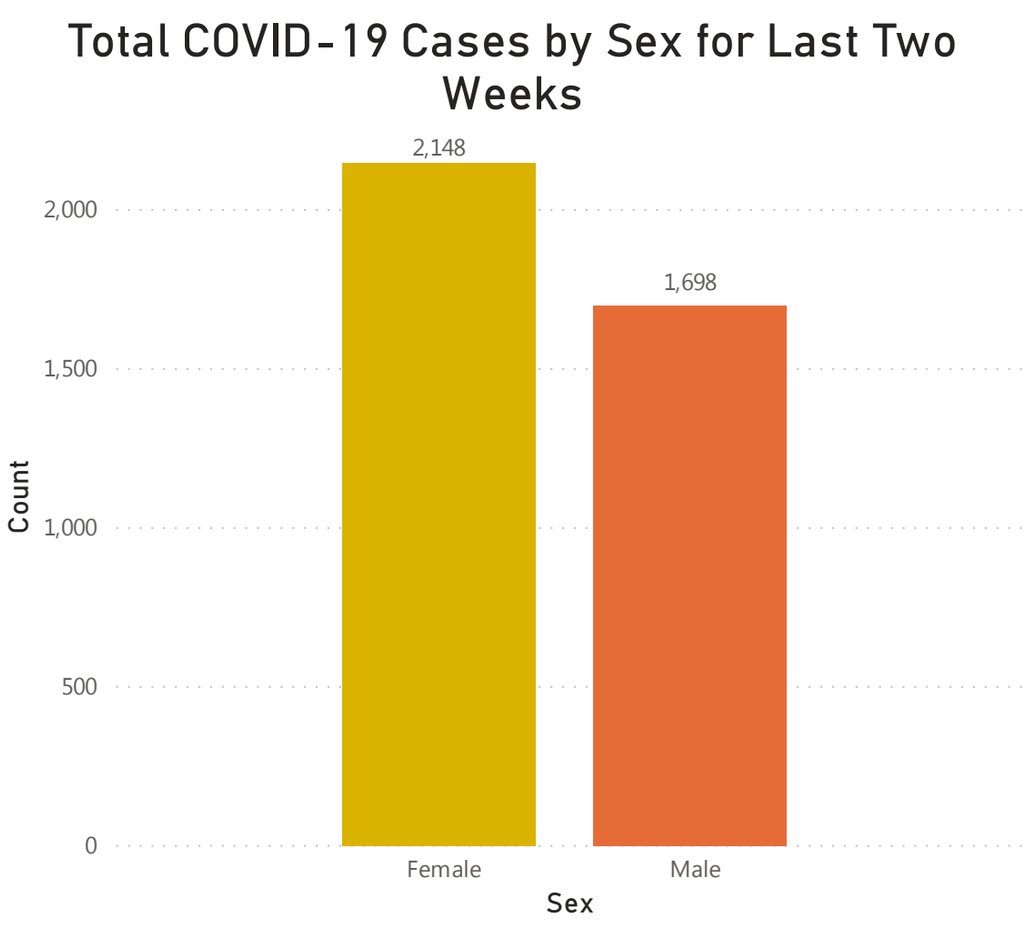

Average age of Total COVID-19 Cases

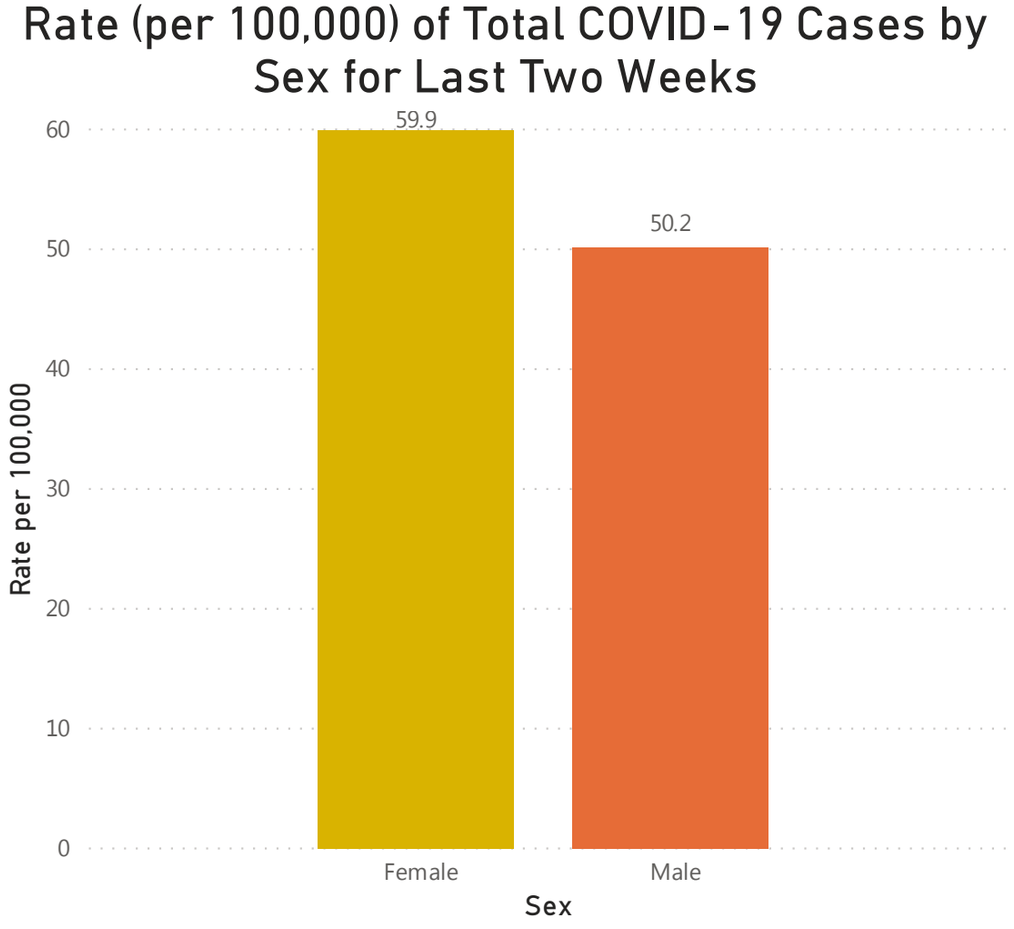

39

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am on the date at the top of the page. Includes both probable and confirmed cases.

Cases and Case Rate by Sex for Last Two Weeks

This data covers 7/26/2020 to 8/8/2020

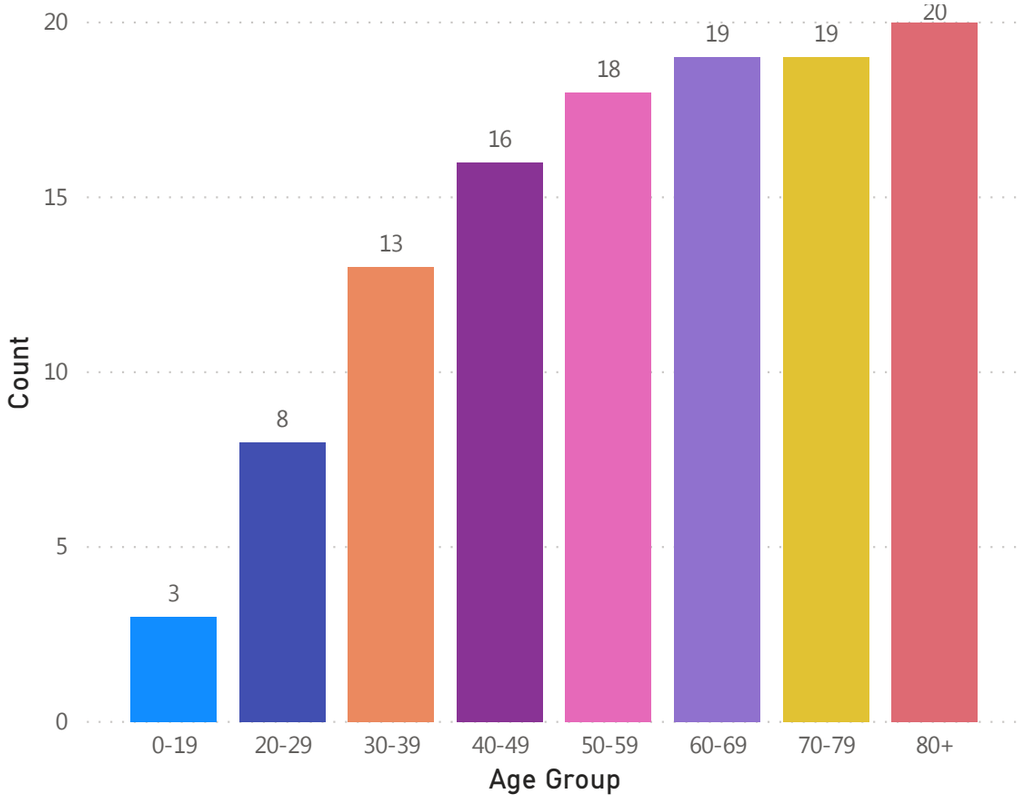

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am on the date at the top of the page. Includes both probable and confirmed cases.

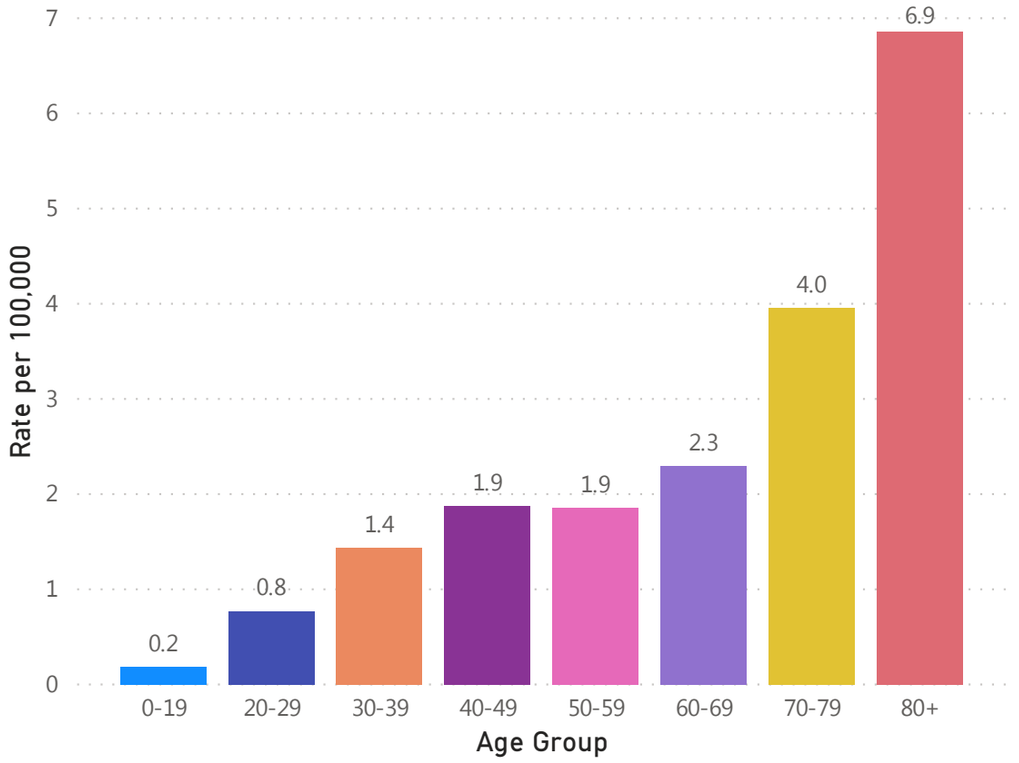

Hospitalizations & Hospitalization Rate by Age Group for Last Two Weeks

This data covers 7/26/2020 to 8/8/2020

Total COVID-19 Cases Reported as Hospitalized* by Age Group for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Cases Reported as Hospitalized* by Age Group for Last Two Weeks

Average Age of Total Cases Reported as Hospitalized*

59

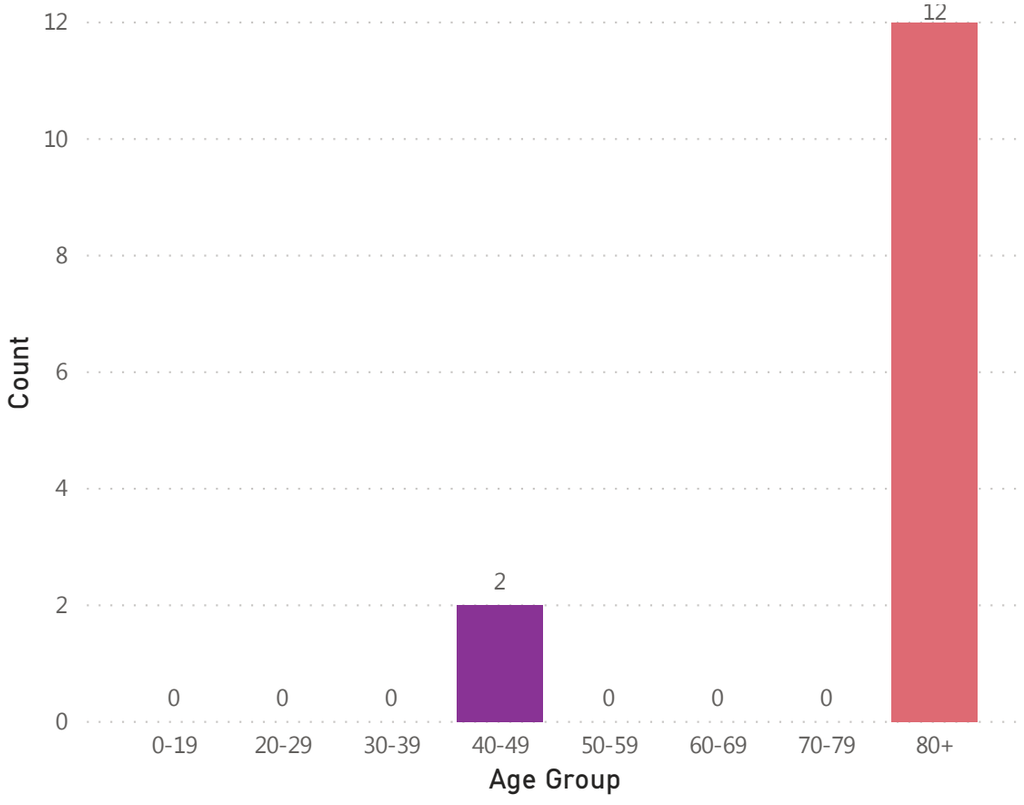

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health.

Notes: all data are current as of 10:00am on the date at the top of the page; *Hospitalization refers to status at any point in time, not necessarily the current status of the patient, demographic data on hospitalized patients collected retrospectively; analysis does not include all hospitalized patients and may not add up to data totals from hospital surveys. Includes both probable and confirmed cases.

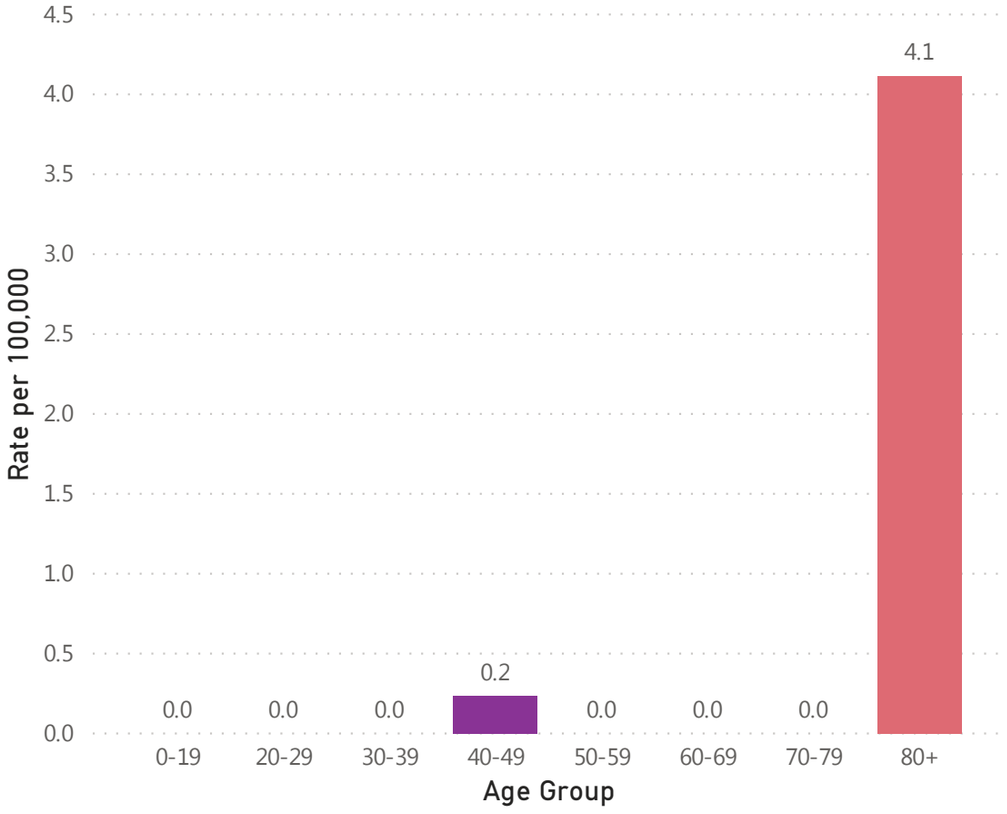

Deaths and Death Rate by Age Group for Last Two Weeks

This data covers 7/26/2020 to 8/8/2020

Deaths by Age Group in Total COVID-19 for Last Two Weeks

Rate (per 100,000) of Total COVID-19 Deaths by Age Group for Last Two Weeks

Average Age of Deaths in Total COVID-19 Cases

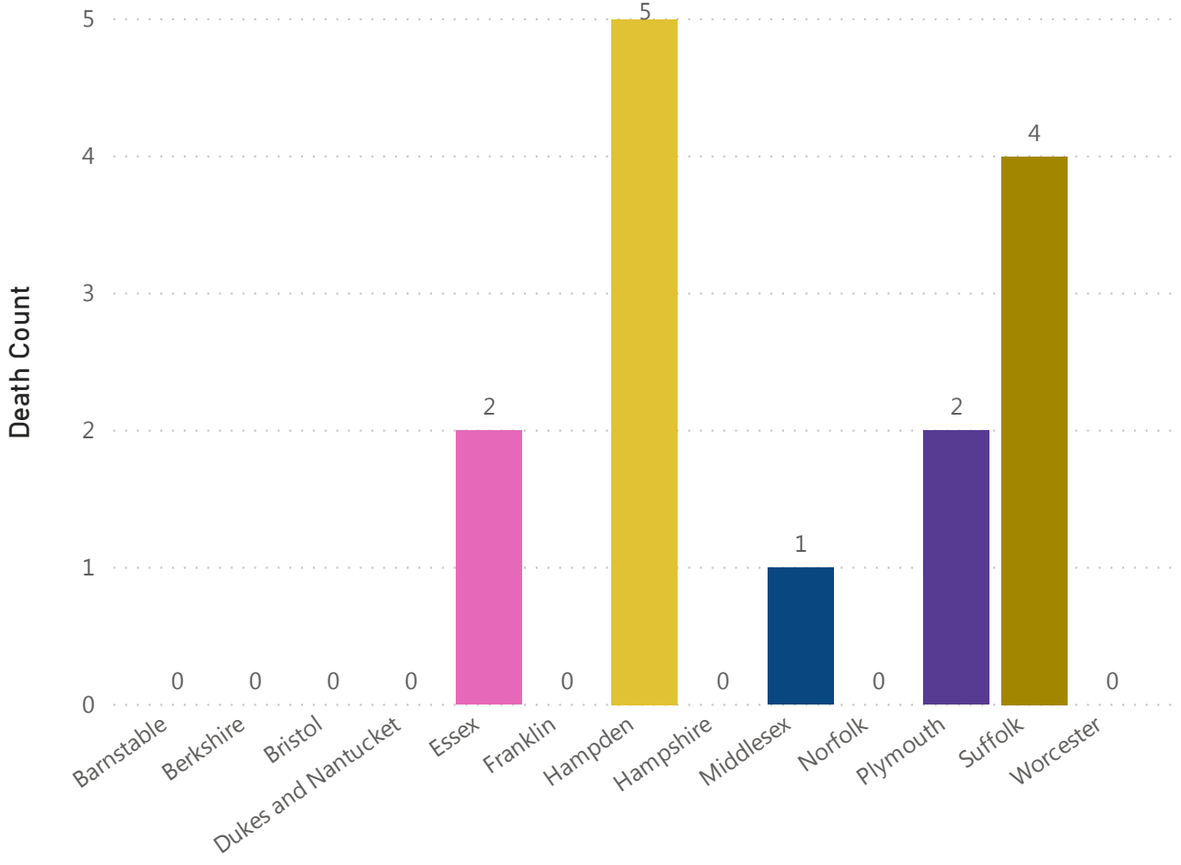

86

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences and the Registry of Vital Records and Statistics; Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am on the date at the top of the page. Includes both probable and confirmed cases.

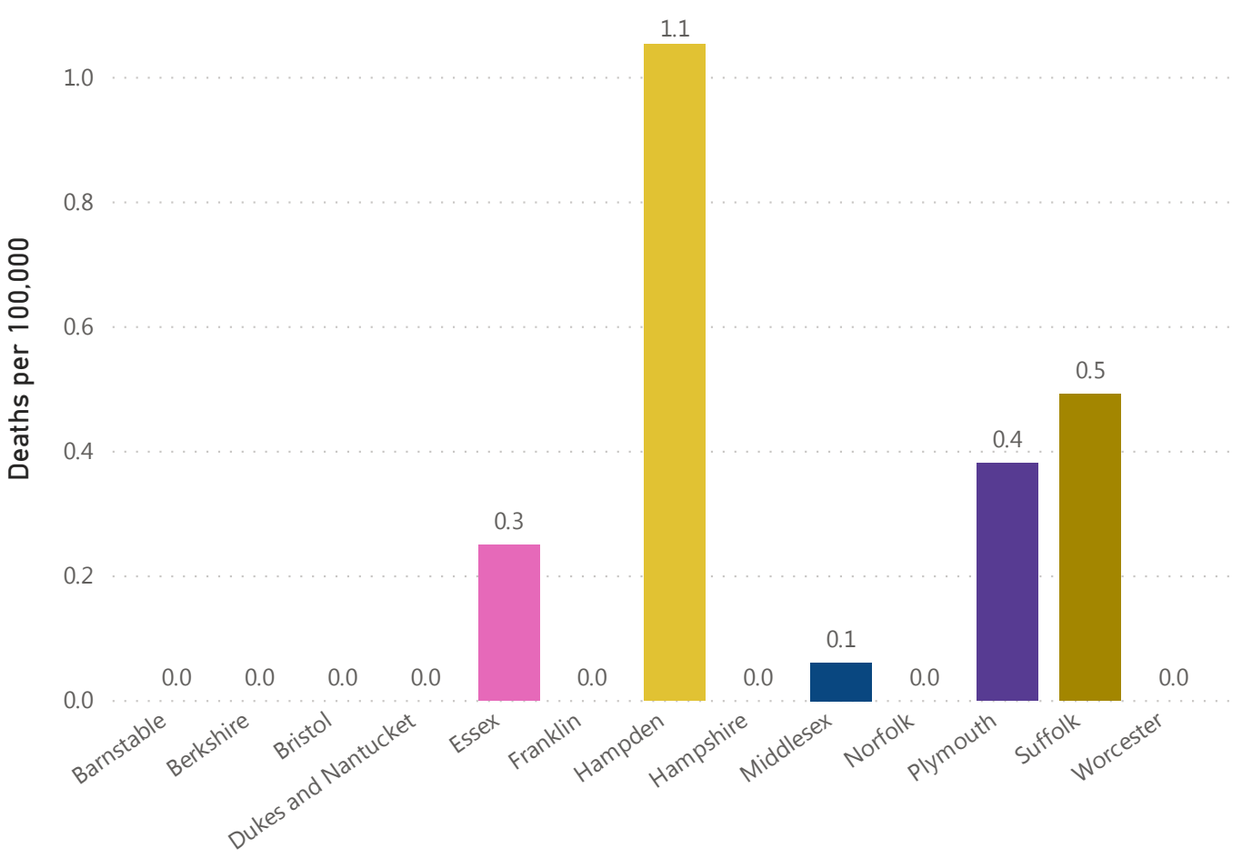

Deaths and Death Rate by County for Last Two Weeks

This data covers 7/26/2020 to 8/8/2020

Count of Deaths in Total COVID-19 Cases by County

Rate (per 100,000) of Total COVID-19 Deaths by County

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; County Population Estimates 2011-2018: Small Area Population Estimates 2011-2020, version 2018, Massachusetts Department of Public Health, Bureau of Environmental Health; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am on the date at the top of the page. Includes both probable and confirmed cases.

Probable Case Information

Probable

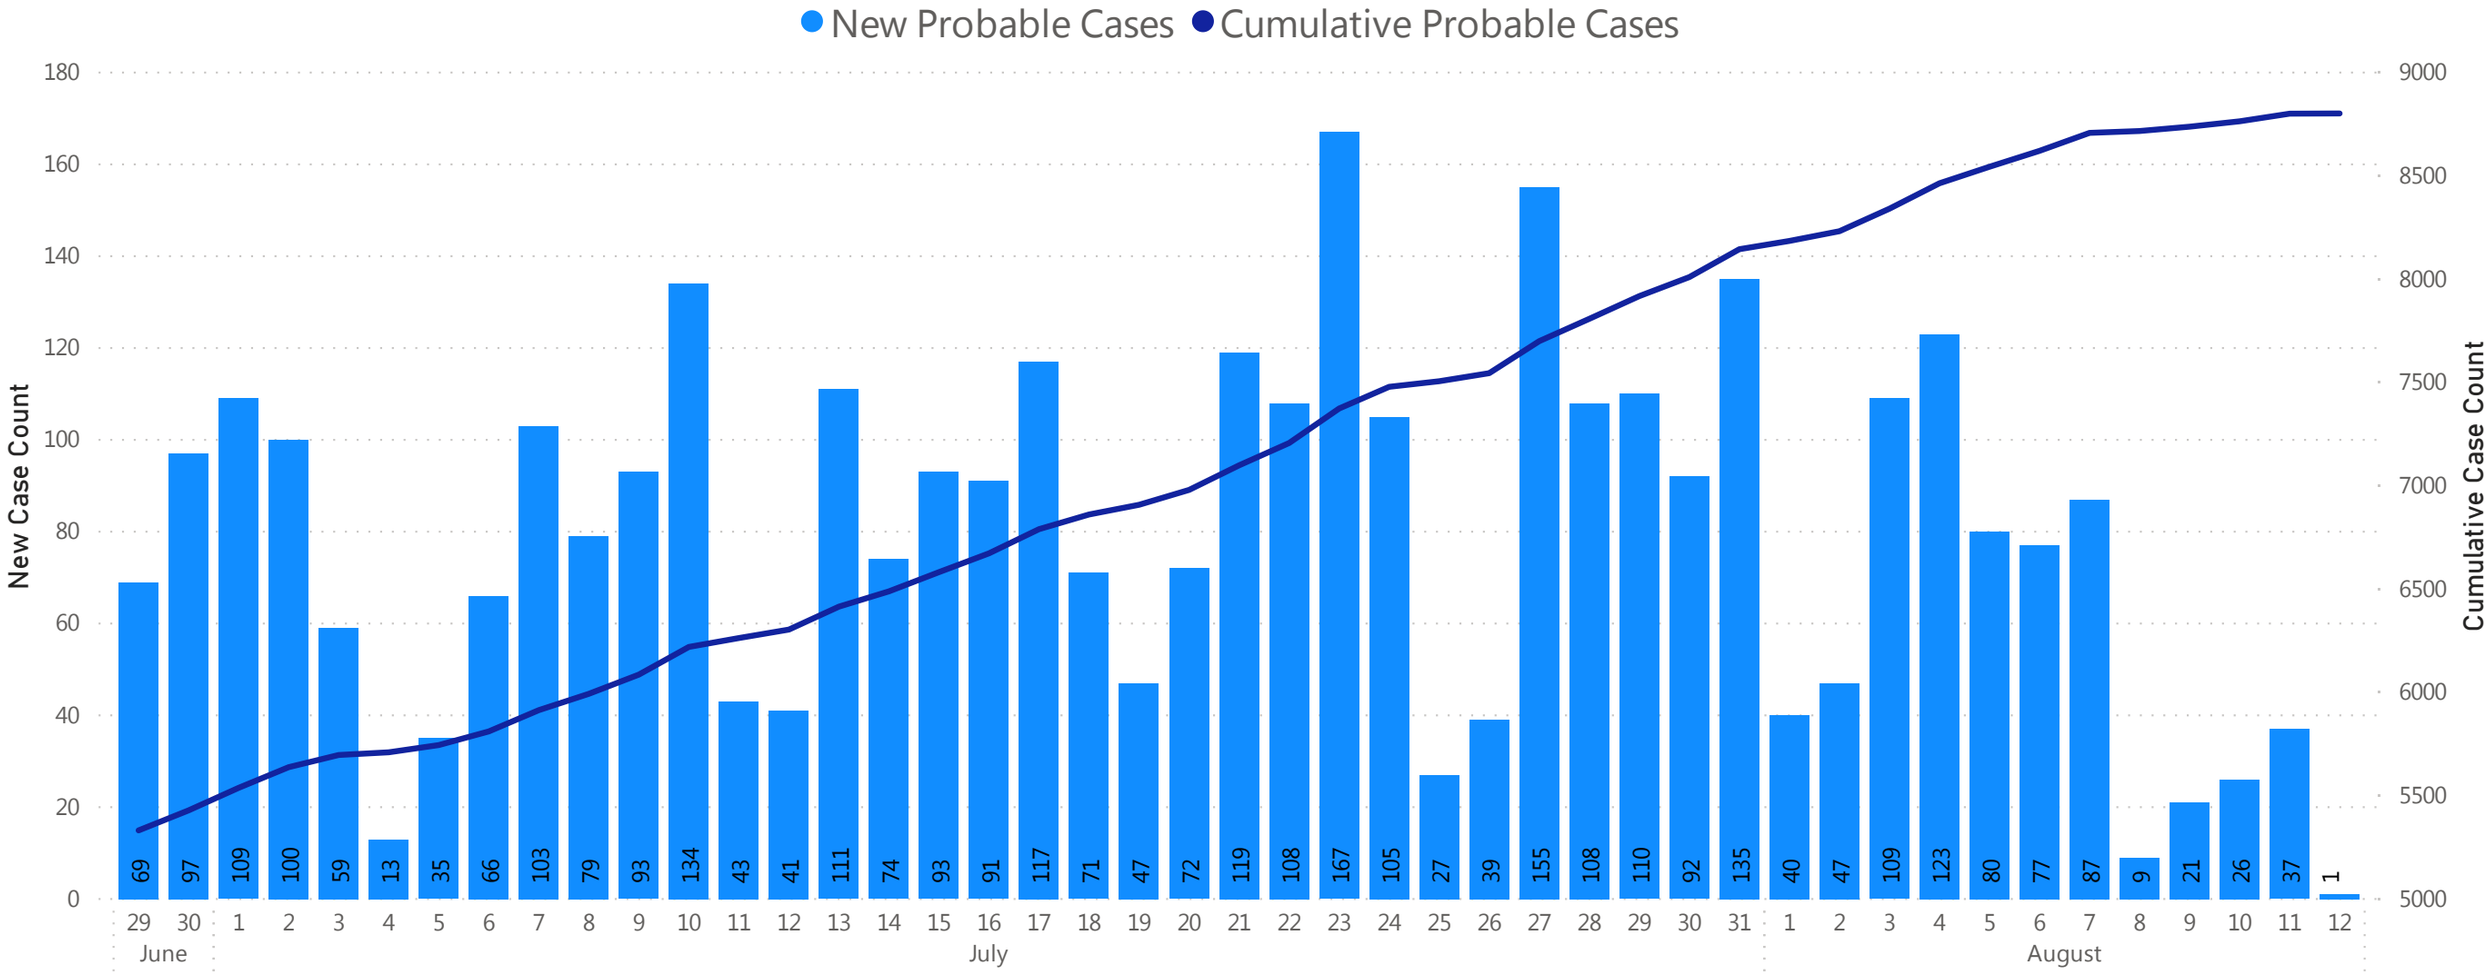

Newly Reported Probable Cases Since Last Week	Total Probable Cases
530	8,802

Newly Reported Deaths among Probable Since Last Week	Total Deaths among Probable Cases
1	222

Patients with a positive serology/antibody test and either COVID-like symptoms or likely exposure to COVID-19 are counted as probable cases.
Patients who did not have a laboratory test but whose death certificate listed COVID-19 as a cause of death are counted as probable deaths.
Patients who did not have a laboratory test but had COVID-like symptoms and were likely exposed to COVID-19 are counted as probable cases.
Probable cases are included in all counts from March 1 onward.
For more information on the Probable case definition, see https://cdn.ymaws.com/www.cste.org/resource/resmgr/2020ps/Interim-20-ID-01_COVID-19.pdf

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, and the Registry of Vital Records and Statistics;Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am.

Daily and Cumulative Probable Cases

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences; Tables and Figures created by the Office of Population Health.
Note: all data are current as of 10:00am on the date at the top of the page; Data previously shown according to date report received; data now presented according to date the individual was tested. Due to lag in reporting by laboratories, counts for most recent dates are likely to be incomplete.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System

PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System

Long-Term Care Staff Surveillance Testing

- On June 30, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings
- **Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- To determine the cadence of surveillance testing, nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19th
- Facilities are required to adhere to a surveillance testing regimen based on the results of the baseline testing and adapt such regimen based on the presence of new cases; specifically:
  - **If there are COVID+ cases, the facility must test all staff weekly until there are no new cases for two weeks**
  - **If there are no COVID+ cases, the facility must either test all staff, or 30% of staff, bi-weekly, depending on the transmission rates in the facility's EMS region (included in this report)**
- This report includes information on what staff surveillance testing regimen each facility is required to adhere to, and the percentage of staff tested during the latest complete testing period
- The state is supporting surveillance testing costs for nursing facilities and rest homes through September, at which point EOHHS will reassess the testing policy based on public health metrics

Testing Results (through 8/6)

Total facilities required to submit testing data	**429**
In Compliance *(Total facilities attesting to achieving testing threshold)*	**338**
Not In Compliance *(Total facilities not achieving 90% staff testing threshold)*	**22**
Did Not Report *(Total facilities that did not submit testing data)*	**69**

Infection Control Surveys

DPH serves as the State Survey Agency (SA) that submits COVID-19 nursing home data on behalf of Massachusetts to the Centers for Medicare & Medicaid Services (CMS). As outlined in the June 1st CMS memorandum CMS updated its COVID-19 reporting requirements to ensure 100% of Medicare- and Medicaid-certified nursing homes receive on-site review to mitigate the spread of COVID-19. Reporting requirements apply *only* to Medicare- and Medicaid-certified nursing homes, not *all* facilities in the state.

Multiple Surveys Explained: CMS requires states perform COVID-19 survey activities in addition to completing the required Focused Infection Control surveys of 100% of Medicare- and Medicaid-certified nursing homes by July 31, 2020. In addition, CMS requires states perform on-site infection control surveys within three-to-five days of identification of any nursing home with three or more new COVID-19 suspected and confirmed cases since their last National Healthcare Safety Network (NHSN) COVID-19 report or any nursing home in which one confirmed resident case is present in a facility that was previously COVID-free.

Deficiencies Explained:

- The **severity** level reflects the impact of the deficiency and is categorized by four levels of harm.
- The **scope** level of a deficiency reflects how many residents were affected by the deficiency.
- For each deficiency, the DPH survey team determines the level of harm (**severity**) to the resident or resident(s) involved and then determines the **scope** of the problem within the nursing home.
- The team assigns an alphabetical Severity and Scope value to the deficiency. In the report below, the alphabetical values are A through L. Values closer to A signify lower scope and severity. Values closer to L (i.e. G or higher) signify higher scope and severity.
- The key at the bottom of each page indicates the level of deficiencies reported, which corresponds to dots of different colors: **Green** = Deficiency-free survey; **Yellow** = D-level deficiency; **Pink** = E/F-level deficiency; **Red** = G or higher

349 facilities received a combined total of 471 Infection Control Surveys.
As of July 24, 2020, 471 surveys were finalized and results mailed to facilities. Of those 471 surveys:

New Surveys With 2 Deficiencies	2 Facilities
New Surveys With 1 Deficiencies	71 Facilities
New Surveys With 0 Deficiencies	398 Facilities

CMS Infection Control Surveys Conducted at Nursing Homes

The Centers for Medicare and Medicaid Services (CMS) requires infection control surveys to be conducted at all Medicare- and Medicaid-certified nursing homes as defined in the following link: https://www.cms.gov/files/document/qso-20-31-all.pdf. DPH conducts these surveys on behalf of CMS.

Some facilities that meet certain CMS requirements have been surveyed more than once. Follow-up infection control surveys must be conducted within three-to-five days when: (1) one confirmed COVID-19 case is reported in a nursing home that previously did not have any COVID-19 cases, and (2) three or more new suspected and confirmed cases are reported in nursing homes in one week that had previously reported a case.

Reflects surveys processed between June 1, 2020 and July 24, 2020 **471 Surveys completed and mailed as of July 24, 2020**		KEY: Green = Deficiency-free survey; Yellow = D-level deficiency; Pink = E/F-level deficiency; Red = G or higher

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Victorian Health of Chatham	Barnstable County	40	0
Village at Willow Crossings	Bristol County	118	>30

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Massachusetts Department of Public Health COVID-19 Dashboard - Wednesday, August 12, 2020

COVID Cases in Assisted Living Residences (5/5)

Cumulative data collected as of 8/12/2020 8:00am

Facility	County	Maximum Capacity	Number of Confirmed Cases*
Visiting Nurse Assisted Living	Middlesex County	97	0
Waltham Crossings	Middlesex County	112	>30
Waterstone at Wellesley	Norfolk County	52	1-10
Whaler's Cove	Bristol County	130	1-10
Whitcomb House	Worcester County	87	0
White Oak Cottages	Norfolk County	24	1-10
Whitney Place at Natick	Middlesex County	106	11-30
