Comparison of COVID-19 Wastewater Levels and COVID-19 Laboratory Testing Percent Positivity, Oklahoma, 2022-2023

Wastewater from a sewer shed (the community area served by a wastewater collection system) is collected as it flows into a treatment plant. Wastewater surveillance captures presence of Influenza shed by people with and without symptoms. ≤1250 Copies/L is a non-detect. Wastewater data collected in partnership with University of Oklahoma and OU Health Sciences Center.

COVID-19 Surveillance Summary, Oklahoma

Wastewater	Percent Positivity	Hospitalizations	Overall Activity
Decreasing	Decreasing	Plateau	Decreasing
